Dear Sirs:

My name is Grace Babcock and I was given permission to forward this letter to you regarding the continued efforts in making our community at Hillcrest Bay a better place to live and enjoy life. This letter was emailed to John Sears, Committee Chairperson, for the Underground Conversion Service Area Project from an owner supporting the project, Art Wood. I hope you will post this letter for I feel there are many more owners who feel the same way.

Warm regards,

Grace D. Babcock

Hi, my name is Art Wood on 927 Swan Dr; I just wanted to tell you how happy I am to have such a good person as the Chair of the underground Utility Project. I just wish that all the negative comments could be turned into positive ones and let's get on with the project. I think you're doing a fine job, so keep it up. It's about time that money gets spent on improving the community; we need to get with the times. I am a strong supporter of improving the community and it would be sad to have this project fail due to the few opposing property owners. I feel that if the majority of property owners wish to improve their properties in a way that benefits everyone in the long run and makes the Community a clean and respectable residential community is a positive. I am sure that a solution can be accomplished, thanks for keeping everyone informed.

I really enjoy the community; everyone seems nice and willing to help. I have met some of the people who are opposing the project and they all seem very nice and I know that maybe some day soon they will also help in making sure the project gets funded. Not everyone can agree, but if the majority does, the project should go forward.

Regards

Art Wood
